

ANNUAL HEALTH AND PERFORMANCE REVIEW - SHEEP

It is a requirement that you annually complete a review of health and performance records. This must comprise of a review of mortality records (and possible reasons for mortality); reason for treatment (taken from the medicine records) and abattoir feedback (where provided).

Below is a template that covers all of the information you must complete. You may use a different template, but equivalent information must be provided.

Health problem data collation (annual tally)

Use this table to tally the treatments given that did not form part of the routine management of stock, and any deaths/ culls or feedback from a vet/ abattoir that may be attributable to a health problem.

Condition	Animals Treated	Mortalities			Abattoir ¹ / Vet Feedback	Comments
		Died	Euthanased	Culled		
Lameness - Ewes						
Lameness - Lambs						
Metabolic disease						
Clostridial disease						
Infectious disease						
Parasites	Scab					
	Flystrike					
	Fluke					
	Worms					
Ewe Specific	Abortion					
	Prolapse					
	Difficult Lambing					
	Barren					
	Mastitis					
	Other					
	Unknown					
Lambs	Congenital Defect					
	Starvation/ Exposure					
	Orf					

¹ If available

	Joint ill						
	Other						
	Unknown						

Mortality data collation

Collating the total mortalities by age category is useful alongside collating by health problem.

		Tally	Comments
Lambs	Born dead		
	Lost to approx.. 7 days		
	Lost 7 days to weaning		
	Lost post-weaning		
Ewes			
	Total		

Top issues to act upon

Having reviewed your records and collated data, identify the Key issues in your flock. You must consider the actions to be taken, and where appropriate act upon them.

Issue	Brief explanation	Actions already taken	Actions to be taken
